

1

"The portal provides access to open data from international, EU, national, regional, local and geo data portals. It replaces the EU Open Data Portal and the European Data Portal. The portal addresses the whole data value chain, from data publishing to data reuse."

OBJECTIVE

Its main objective is to help boost the re-use and combination of open public data across the EU for the development of information products and services.

Public Traffic Open Data

"Access to re-usable public sector information"

WHO CAN BENEFIT?

High value sectors such as geo-location, tourism, transportation, logistic, marketing and decision support systems would be on the first line to benefit from more abundant, cross-border availability of open data, meaning data that can be used and re-used freely.

LOD-RoadTran18

SUPPORTING THE CROSS-BORDER USE OF ROAD TRAFFIC DATA WITH LINKED OPEN DATA BASED ON DATEX II

The LOD-RoadTran18 project aims to support the re-use of dynamic Road Traffic Data in and across two Member States, namely Czech Republic and Spain. This Action uses the European Data Portal and connects it with any other sector data by using Linked Open Data (LOD).

LMT is a company with a broad experience in providing ICT services, technical assistance and ICT consultancy, including the management of Open Data Projects.

POLICY AND APPLICATIONS

POLICY

This DSI implements one of the key actions included in the Commission Communication on Open Data of December 2011, following the basis of the Directive on the re-use of public sector information. (Directive 2003/98/EC) and its revision (2013/37/EU).

APPLICATIONS

1. Open Data and Smart Cities
2. Open Data and Science
3. Open Data and agriculture
4. Open Data for transparency

OPEN DATA

The core of the Public Open Data infrastructure is a comprehensive pan-European Open Data portal providing harmonised access to data sets created and managed by public bodies in the Member States, including national, regional and local levels of government.

Open Data refers to data that is available and accessible to everyone. This data has to accomplish the following criteria:

1. Availability and accessibility
2. Re-use and redistribution
3. Universal involvement
